BEFORE SIGHTING BY REPORTING PARTY X GALV WEATHER BUREAU REPORTS  
RELEASING ONE WEATHER BALLOON AT 1822Z

At the Command  
the wind direction in velocity  
would bring the balloon released  
at 1822Z over observers location  
in an hour or more. The wind  
at a higher altitude was  
probably fast enough to move  
the balloon at a fairly high  
rate of speed.
